Objective

I am a passionate web developer, a detail-oriented, multitasking professional with exceptional coding techniques. I'm a very ambitious web developer looking for a role in an established IT company to work with the latest technologies on challenging projects. I have honed my skills in front-end technologies like React and Javascript, as well as back-end technologies like Node.js and MongoDB.

Skills

- JavaScript
- React JS
- Redux JS
- Tailwind
- HTML
- Node JS
- Express JS
- Mongo DB
- Mongoose
- CSS

Experience

MERN Stack Developer Intern Idevify Solutions pvt Ltd May 2024 - Oct 2024

- In this company, I've learned to build web applications using the MERN stack.
- My tasks include creating user interfaces with React and working on the server side with Node.js and MongoDB. I'm gaining valuable teamwork skills and practical experience.

Projects

<https://github.com/nitinthakur01>

ADMIN PANEL (React & Tailwind)

- I have developed a comprehensive admin panel for managing e-commerce websites.
- The panel provides a user-friendly interface for administrators to efficiently manage products, orders, users, and site settings.

E-COMMERCE CART (React & Redux-Toolkit)

- It is a user-friendly shopping cart system for an e-commerce platform.
- The shopping cart enables users to seamlessly add, update, and remove products, as well as proceed through the checkout process with ease.

WEATHER APP (React & Tailwind)

- Weather app that provides current weather conditions, forecasts, and other data for various locations.
- The app includes features like real-time weather updates, location-based weather reports, and detailed forecasts.
